SKU Import

Introduction

The SKU import module in Vin eRetail enables the user to import SKUs to the system in bulk using the CSV template file. It also allows to download the uploaded CSV file.

Navigation: Master >> SKU Management >> SKU Import

SKU Import

The SKU Import module consists of two sections:

- i. Import
- ii. Download

I. Import: This section allows the user to import the SKUs in Bulk via CSV template file.

 A screenshot of the SKU Import module interface. At the top, there is a breadcrumb trail: Master > SKU Management > SKU Import. Below this, there are two tabs: 'Import' (which is highlighted with a red box) and 'Download'. The 'Import' section contains several fields: 'Import Type' with a dropdown menu set to 'Create/Update', 'Attribute Set' with a dropdown menu set to 'Default', and 'Upload Template' with a 'Choose File' button and a 'Download Template' link. A note at the bottom states: '**Note: Max 500 rows can be imported in an attempt of Import.'

The following fields are available for the user to import the correct SKU details.

a. Import Type: The user can define the purpose of the import by selecting any of the dropdown choices, which are:

1. Create/Update: To create or update the SKUs in bulk
2. Cost Price Update: To update the price of the SKUs in bulk
3. BOM Link: To import BOM SKUs in bulk

b. Attribute Set *: User will select the attribute set for SKU import from here. The SKU imported from here will be assigned to the selected attribute.

c. Upload Template: User will select the appropriate CSV file to be imported, using the 'Choose File' option.

'Download Template' option allows the user to download the CSV template file for the selected 'Import Type'.

****Note: Max 500 rows can be imported in an attempt of Import.** (However, only for a first time import of the SKUs, the no. of rows can be increased from backend at the request of the user)

1. **Download:** This section allows the user to search and download the uploaded CSV file of SKU import by first searching them based on File Status, file Upload Date and other similar criterion.

Master > Sku Management > Sku Import

Search Reset ?

Import Download

| File Name | File Status | Upload Date | Upload By | Success Records | Failed Records | Import Type |
|-----------|-------------|-------------|-----------|-----------------|----------------|--------------|
| | UnProcessed | 01/03/2022 | | | | CreateUpdate |

Action Buttons

- On Import Section

1. IMPORT: After selecting the Import Type, Attribute Set and Uploading the correct file, the user needs to click on the yellow coloured "Import" button to start the import process.
2. RESET: This is used to reset all the selections made on the screen.

- On Download Section

1. SEARCH: This is used to display the list of uploads made by the user.
2. RESET: This is used to reset all the filters selected by the user.
